

GERM AWAY

MRSA Killing Wipes

Description: GermAway M.R.S.A. Killing WIPES is a E.P.A. non-woven disposable cloth containing a stable, low pH formulated disinfectant and deodorant for use on hard, non-porous surfaces. Our GERM AWAY wipes are bactericidal - the formula kills (MRSA) Methicillin-resistant Staphylococcus aureus Escherichia coli, Pseudomonas aeruginosa, Salmonella enterica, and more. The formula is also virucidal against HIV-1 (AIDS virus), Herpes Simplex 1 and 2, Avian Influenza A virus (H5N1) and more. GERMAWAY WIPES are certified against all type "A" viruses including the H1N1 strain of influenza. Commonly known as "Swine Flu". These wipes are also great for sanitizing fabric and leather, shoes, mats and equipment.

Directions: Do not use as a diaper wipe or for personal cleansing. Do not flush. This wipe will not harm most surfaces, however do a spot test on an inconspicuous area on plastic surfaces before using. To clean and disinfect/virucidal*/mold and mildew control: wipe hard, nonporous surface with wipe until surface is visibly wet, and let stand for 4 minutes. For Norwalk Virus, Norovirus, and Rotavirus, allow to remain wet for 10 minutes; let air dry. For extremely dirty surfaces, clean first with another wipe before disinfecting. See package for more detailed instructions.
